To whom it may concern,

Let me share my thoughts with you about Gray Bashew. I've hired Gray to work with me here in Atlanta at IBM over the past two years when he's been home from school. He's the best young engineer I've ever hired. He's reliable, dependable and quick.

It's clear he's got a great love for engineering, music production and a drive to excel. At IBM, he's recorded and edited VO, sfx and music. He wrote two songs for a technology summer camp that IBM sponsors called Excite Camp. He created the music tracks, wrote the words and directed the campers to sing the parts he had written for them. He's really impressed me and I can tell that although he's young, he'll be known as one of the best producers in the business.

Thanks,

Rob Grable/68sound.com
